

PROFILE SUMMARY

Dedicated Software Engineer with extensive experience in delivering innovative solutions across a wide range of projects. Proficient in designing and developing high-quality software with a focus on seamless functionality and performance optimization across platforms. Skilled in API integration, real-time feature implementation, and scalable system architecture. Experienced in building robust web applications using Node JS and Laravel for E-Commerce, Social Media, HRM, CRM, and ERP systems to streamline business operations.

CORE STRENGTHS

Technical Skills: PHP, Laravel, Node JS, JavaScript, jQuery, Python, FastAPI, MySQL, SQL, HTML5, CSS3, Bootstrap, Git & Version Control, REST APIs, WebSockets, AWS S3, FFmpeg, Real-Time Systems, Live Streaming Integration, Payment Gateway Integration (Stripe), OpenAI Integration, AI Model Integration.

Professional Skills: Experienced in REST API design and scalable backend development with expertise in third-party integrations, payment gateways, real-time chat, notifications, audio/video calling, live streaming, and WebSockets. Strong knowledge of database design, query optimization, authentication/authorization, and backend infrastructure. Experienced in AI model integration using Python FastAPI with OpenAI and local models. Skilled in performance optimization, system scalability, secure coding practices, debugging.

EDUCATION

Bachelors in Business & Information Technology (BBIT) 2022 – 2024
Virtual University Of Karachi, Pakistan

FSC in Commerce 2017
Government City College, Karachi, Pakistan

WORK EXPERIENCE

Software Engineer Feb-2025- Present
Brandigo

- Developing scalable backend systems using Laravel and Node.js.
- Building and maintaining high-performance REST APIs.
- Designing optimized database schemas and improving query performance for large-scale systems.
- Integrating third-party services and APIs into enterprise-level applications.
- Working on AI-powered features using OpenAI integrations and custom AI workflows.
- Developed dynamic PDF generation systems using wkhtmltopdf for large-scale, multi-page documents and structured reports.
- Implementing background job processing using queues for handling heavy and time-consuming tasks efficiently.
- Utilizing Redis for caching, session management, and performance optimization.
- Managing file storage and media uploads using AWS S3 for scalable and secure cloud storage solutions.

Software Engineer Apr 2022 - Jan 2025
Binate Digital Pvt Ltd

- Developing and implementing robust REST APIs using Node JS and Laravel.
- Implementing database schemas, ensuring data integrity and efficient data retrieval.
- Integrating third-party APIs and implementing secure authentication and authorization mechanisms.
- Developing and maintaining backend infrastructure for scalable and high-performance applications.
- Committed to delivering high-quality, maintainable, and scalable backend and frontend solutions.
- Audio/Video Calling and Live Streaming features integration in Node JS using third-party services like 100ms.

Software Engineer Nov 2021 - Mar 2022
DA TECH

- Developed and implemented robust REST APIs using Node JS, PHP, and frameworks such as Laravel and CodeIgniter for social media and e-commerce platforms.
- Designed and implemented efficient database schemas ensuring data integrity and optimal performance.
- Integrated third-party APIs and payment gateways to enhance platform functionality and user experience.
- Optimized API performance and response times for seamless user experience.
- Developed and maintained backend infrastructure for high-traffic applications ensuring scalability and reliability.
- Contributed to the design and implementation of backend architecture for complex applications.
- Delivered high-quality, maintainable, and scalable backend solutions aligned with business requirements.

Software Engineer Jan 2019 - Oct 2021
Trices.net

- Developed and implemented scalable applications for school/university management systems, including custom ERP modules.
- Designed efficient database schemas to manage student records, faculty data, attendance, grades, and other educational information.
- Integrated third-party APIs such as payment gateways and SMS providers to enhance system functionality.
- Optimized database queries and application logic to improve performance and system responsiveness.
- Ensured data security and integrity using proper access control and encryption techniques.
- Worked with Git for version control and team collaboration.
- Delivered high-quality, maintainable, and user-friendly solutions for educational administration systems.
